Touch Vision 6000

This unit is the ultimate in rugged outdoor kiosks, made of marine grade stainless steel with a vandal resistant, toughened laminated touch screen. An attack alarm is fitted as standard. An ultra, high brightness, 15.1" display with automatic backlight tracking facilitates 24 hour viewing - used for passenger information in bus or train stations.

Screen	15.1" 1000 cd ² m touch screen
Computer	industrial SBC
Options	card readers keyboards
Finishes	316 stainless steel

SABRE Vision has the expertise and development facilities to design and manufacture completely customised kiosks.

However, the vast range of finishes and the ability to add company logos or special text to our standard units allows each customer to have his own unique kiosk without the expense of product development - just add your imagination to our experience!

In this leaflet, you can see just some of our and our customers' ideas. Give us a call and we would be delighted to discuss your ideas and application. Our advice is always free and, you never know, we may have just what you are looking for.

Combine 25 years of our displays experience with your software to provide the best user experience.

SABRE is an ISO 9002 –2000 certified company and a NATO approved supplier.
